Have you ever wanted to meet a person who changed the world? In her own way, that's what Jeraldine Saunders has done. Her autobiographical book, and the TV series that came from it, is the reason for a 3,000 percent increase in the cruise ship industry. She is quite literally responsible for making it the enormous success that it is today. How could one book make such a change? You can find out when you read *Love Boats* (revised and expanded version of *The Love Boats*). You'll also be amazed and amused at her many experiences during her ten years as a cruise director. Unlike the fictional stories on the TV show, the stories you read here are all true. Tales of love and hate, sex and silliness, greed and generosity, beauties and beasts, all on the ships that travel the seas to give their passengers a chance to see the world and experience life to its fullest. Jeraldine is a student of astrology, numerology, graphology, palmistry, and more. You'll read about this, too, including a wonderful explanation of why some seemingly scientifically-minded people don't accept astrology (no funding for research), and what will happen in the future. This photo-filled book is fun to read and filled with information and observations about life and the world. Get your copy of *Love Boats* today.

The original Love Boat Cruise Director, Jeraldine Saunders is known world-wide for her books, lectures, and civic activities. She has published eleven books, and has appeared on Good Morning, America, Johnny Carson, Merv Griffin, and more than 850 other TV and radio talk shows all over the world. She serves as National Spokesperson for the Hypoglycemia Foundation of America, and is affiliated with the American Federation of Astrologers; Poets, Essayists, and Novelists (PEN); Film Welfare League; Screen Actors Guild/American Federation of Television and Radio Artists; Academy of Television Arts & Science; and the International College of Applied Nutrition. Jeraldine also lectures worldwide on astrology, graphology, numerology, palmistry, and face-reading. *THE LOVE BOATS* is an autobiographical account of Jeraldine's years as a hostess, then cruise director aboard several posh luxury ships. After a career as a couturier model, Jeraldine took a job lecturing on astrology, motivation, and the Four Seasons color concept on cruise ships before becoming the industry's first female Cruise Director. She turned this decade-long experience into a book, then later parlayed that into a television series, *THE LOVE BOAT*, currently in syndication in over 110 countries.

An interesting look at what cruising was like a couple of decades before becoming so popular. I read this a few days before taking my 8th cruise, and thoroughly enjoyed it. I wish the book had been twice as long, as the author must have had MANY more stories to tell!

I bought this book because I do a lot of cruises and my PhD Friend insisted that I purchase it. I bought one for her too. It's a good book.

I loved most of this book. I loved The Love Boat. Truly interesting slice of life.

"Love Boats" by model, nutritionist, and cruise director Jeraldine Saunders is a breezy slice of life aboard classic cruise ships - all the humor, adventure, and romance. Ms. Saunders was the real-life "Julie McCoy" - the first female cruise director, and a true pioneer. She gives the reader an insider's view of life aboard cruise ships in the 60's and 70's. Amid the entertaining anecdotes, Jeraldine has woven her own fascinating story. This single mom showed true grit, working 7 days a week, almost 24 hours a day, year after year, on cruise ships where everything, it seemed, was the cruise director's job, from patching up injured travelers to keeping passengers calm during crises. An inspirational story, and a vibrant time capsule of a time gone by.

I always wondered about the person that had the idea for that fun show, The Love Boat. She had a very interesting life in a simpler, quieter time in our country. It is nice to remember that not all travel entailed exposing our bare toes and what ever else might be deemed necessary, to board a public conveyance to have a good time. Perhaps, those times will come again.

Ms. Saunders is a really good con artist, as she writes in her first chapter. She conned her way into a high fashion modeling career, then into being a cruise ship hostess. Despite her admitted ability to spell or write, she conned her way into getting this book out. But that doesn't make the book less fun. She may have a ghostwriter or serious editor, but her stories are either real, or a con that gave her fame. Part travelogue, part sales pitch, part autobiographic, her book of the times told all about the life of cruise ships cruising, particularly the crew and passengers on the make. Given the period she writes about (the late 60s and early 70s, before herpes and aids), she's probably truthful about most of the stories about the era of the sexual revolution. They are fun, and her data about the ports of call and life as a cruise ship hostess and cruise directors are probably mostly true. Still, even if I don't believe all of her stories because of her self-admitted history as a con artist, they were good

enough to get her book published, then turned into a TV show, and earned every penny she made by exploding the cruise ship vacation industry. I've been on over ten cruises, and loved every minute of them (except on my second cruise, where I declined to take seasickness antidotes, and suffered accordingly for a few hours). They aren't like the way Ms. Saunders described, but it was a different era. The sexual revolution was over, herpes and aids killed free sex. Still, even if half the stories she has are cons, and the travel information outdated, you'll wish it was all true. Plus, you will love travel at sea - it may not be the Love Boat, but it's one great vacation.

Books sheds lots of life on cruise ships. I've cruised a lot and always wondered what it would be like to work on one.

Excellent
