# The Art Of Playing Rhythm And Blues For Guitar Bass, And Drums, Volume One: The 50's And 60's

## Synopsis

This book/cassette includes several examples of the various musical styles or 'grooves' of such groups as The Temptations, James Brown, and other top acts from the 50's and 60's. The stylistic examples focus on the styles played by background players from the two eras. The cassette contains full rhythm section examples of the exercises from the book. If you want to become the bass player or the drummer in the group, this is made available to you by either turning off either the left or right channel. An outstanding, practical and historical volume.

## Book Information

Paperback: 96 pages

Publisher: Hal Leonard Corporation; Pap/Cas edition (July 1, 1987)

Language: English

ISBN-10: 0793519764

ISBN-13: 978-0793519767

Package Dimensions: 7.8 x 5.1 x 1 inches

Shipping Weight: 800 pounds

Average Customer Review: 5.0 out of 5 stars 2 customer reviews

Best Sellers Rank: #4,262,421 in Books (See Top 100 in Books) #53 in [Books > Arts & Photography > Music > Musical Genres > Rhythm & Blues](#) #473 in [Books > Arts & Photography > Music > Songbooks > Guitars & Fretted Instruments > Bass Guitars](#) #714 in [Books > Arts & Photography > Music > Musical Genres > Soul](#)

## Customer Reviews

When Dr. Licks released this book, it was practically the first of its kind. There were many blues based books but this was one of the first to discuss R&B guitarist. And he nailed it! The examples aren't that difficult so I would suggest this book for intermediate-beginners and beyond. Each mini lessons are broken down into 4 bar grooves, which by the way make up most of the grooves for the songs played back then (e.g. a 4 bars groove in layered parts). All examples are played on the cassettes and the examples are listed in TAB and music form. The examples focus only on the background rhythm players, not the r&b guitar solo which is blues based anyway. However if you want to learn both this r&b rhythm style and solo licks, then check out the list below for current books. THIS BOOK ISN'T WORTH 400.00 WHICH IS THE ASKING PRICE OF THE 3RD PARTY SELLERS; if they come down to 25.00 perhaps, then I would recommend buying this book. Otherwise, check below for alternatives selections. As stated there are many current books

published since the 90s which covers this style of playing along with soloing over r&b, funk, and jazz blues style. They are well worth purchasing... Plus those books come with CDs (not cassette tape) and written in TAB. All are currently sold here at .alternative selections: Rhythm & Blues You Can Use (Book/CD) by John Ganapes Progressive Funk and R&B Guitar Method Book/CD by Peter Gelling Birth of the Groove: R and B, Soul and Funk Guitar: 1945-1965 (Inside the Blues) by Dave Rubins CHEERS!

A true vintage item...come with a real tape, which suggests how old it the book. I know this book for a while, I owned it back in the day and lost it since. Bought it again on , and working with students on this book. Great fundamentals, for every student; If you don't know the book: It gives short examples (4-8 measures) of grooves/riffs, from this era. Both guitar parts are written in notes and tabs, as well as the bass part. Drums part is written as well, which makes it a good book for drummer and bassist too. The tape (which I converted to a CD), offer all the tracks, when the 1st guitar is panned to one channel, second guitar to second channel, so you can easily isolate or eliminate one guitar, or the other by tweaking the balance knob, which getting less and less common (ipod for example, doesn't have it).
