Customer Reviews

For almost 80 years, Kaplan Test Prep (www.kaptest.com) has been helping students grow their knowledge, skills and confidence so they can be their best on Test Day. Our prep books and online

resources provide the expert guidance that students need at every step of their educational journey. Kaplan incorporates years of test-specific data and strategies tested by Kaplan students and our own expert psychometricians. After helping millions of students, we know what works. Our guides deliver knowledge with clarity and simplicity while focusing on the specialized strategies that keep test-takers ahead of the clock and at the top of their game. We offer preparation for more than 90 standardized tests including entrance exams for secondary school, college, and graduate school, as well as professional licensing exams for attorneys, physicians, and nurses. With a full array of self-paced and live online courses, as well as print books and mobile apps, you can use Kaplan to study on your own schedule and at your own speed. Kaplan's private tutors and admissions consultants supplement those offerings with one-on-one support.

The book is a good way to get started studying but don't expect to use it as your only tool (Keep in mind its almost 1000 pages long so going through it will take some time). Some sections are extremely in-depth while others barely scratch the surface. The book is helpful in strategy more than anything. I wish they made the review questions more challenging and DAT like rather than just reiterating what was said in the chapter. The PAT section is very simple and the actual DAT is MUCH harder. Bottom line: if you have more than 3 months to study this is a great place to start, but don't stop here if you want to score well. If you're in a time crunch like I was then you should consider something different.

Good Product

The best book out there for studying for the DAT. Adequately sums up everything you need to know for the DAT without being overly complex.

Don't buy unless you want an easy review. It's easier than the actual DAT.

The sciences were somewhat relevant, even though some were too in depth. The actual DAT focuses on broadness rather than depth. Meaning you should make sure you know just the general info about everything. As for the PAT, do not even try the ones in this book, they are level:1 and the DAT's are level:9000, the practice PAT are nothing compared to the actual DAT.
