Subtraction 0 To 12 Flash Cards (Brighter Child Flash Cards)

Synopsis

Brighter Child's® Subtraction 0 to 12 Flash Cards offer children a fun and easy way to practice their subtraction skills. The set features 54 cards with two subtraction problems each, their answers on the opposite side. Bright, bold numbers are placed on a white background for easy reading, and a special card also offers creative game ideas designed to reinforce learning. The popular Brighter Child's® Flash Cards give children a fun and easy way to practice important skills. Offering 24 titles encompassing preschool to grade 5, each title focuses on an important subject including early concepts, math, phonics, and U.S. History. Fun game ideas and learning suggestions are included to help children build proficiency and confidence. Game cards also allow children to develop thinking, decision-making, turn-taking, and social skills while playing fun games at the same time. Select titles are also available in English-Spanish and Spanish-only versions.

Customer Reviews

This is extremely beneficial especially when you use it with visuals, for example each set we work on I use crayons so my child can see along with the card exactly what is happening and why. The crayons are great my child has so many we never run out.. If its 5 minus 3, I will put five crayons on top and three below it and take it away and it just reflects perfectly and it solidifies what my child is

learning. At the same time makes it fun. That way the child will enjoy doing it and makes learning fun. Going through just the cards can bore them easily you can introduce different things whatever suits your child the best. But a great learning flash card and gets them ready for math for sure

These have been great for my daughter to use for practice for her timed math facts she does at school. By doing these at home she has been able to memorize them and pass her math facts quiz which was 30 facts in 1 minute.

these are a very good quality product. so happy i bought them. i expected something kind of flimsy because the price is only like \$3 but am very happy to say they are sturdy and easy to handle.

These are great flash cards that are easy to read for my seven year-old daughter. She practices her math facts every night with these for a few minutes before bed.

I don't like that the answer to the equation in back of the card is visible, it's distracting. Should be just one equation on each card.

Got these to help my kids out with there math. They picked up on it very fast. Way faster than the school can teach. Personly I couldn't be happier.

i use these for my granddaughter. Every time she gets one right she gets to keep the card. When she has the whole deck, she gets a prize. It works!

My 7 and 5 yr olds compete against each other and try to solve as many cards as possible.

Practicing has never been this fun :)
