Customer Reviews

Helped me pass with a week of studying!!!! Do not be surprised if you do badly on the practice exams. I did not do well on the REA practice exams but scored in the high 50's on the actual CLEP exam. I did supplement some with Instacert flash cards; however, this book was great for providing vocabulary that I needed to know for the CLEP . Highly recommend!

Overpriced, but a good reflection of what will be on the exam. Take an hour to skim the book, take another hour or so to do the practice tests (you probably won't need the full allotted time), then take an hour to review your answers with REA's commentary. If you have some common sense and are good at standardized tests, that will be more than enough to pass (scaled score > 50). If you lack those qualities, you may need to work harder and use a real sociology book. I skimmed the first chapter of the book, got a 64 scaled score on the first full practice test, 70 on the second, skimmed the rest of the book, and then got a 66 on the real exam. I do feel that skimming the book was at least slightly useful towards ensuring a passing grade, though reviewing the practice tests was more important. I had no prior knowledge of sociology beyond what one picks up reading the newspaper. Note that the online versions of the practice tests, which I recommend over the paper versions, are not free if you buy this book; they are discounted to be a total of ~\$3.

I read through the book once, and I reviewed both online practice tests the day of the exam. I passed with a 57. I felt like a lot of definitions on the test were the same as in the book, BUT the test frequently used terms that didn't match the book to name the definitions. I would recommend getting the book and looking over practice tests answers and explanations the day of or before the exam. I had no prior knowledge in this subject area, and this is the only study resource I used.

This is the only source I used and I passed!

So happy I got that class (test) out of the way. I followed the CLEP program's suggested study format and passed with a 70%. You only need a 50% to get credit and it's less than 15% of tuition cost to get out of a semester of fact recitation.

It's ok, not completed this yet, personal issue not a problem with the book

Good explanation but a little short of information. Needs to cover more topics.

The material covered in this book are very broad and doesn't go into much detail - for example it doesn't go into depth about urbanology or economics. I went through Cliff Notes online for additional supplement. Also you have to separately purchase the online test, which was a big bummer. But I did pass the test using just this book + Cliff Notes!
