# What The Wind Showed To Me (Books For Dementia Patients) (Volume 1)

## **Synopsis**

This is one of a series of books for dementia patients (or those with Alzheimer's), disguised as a "real" book. *What the Wind Showed to Me* offers self-esteem and self-confidence to former bookworms who now struggle with "regular" books. You'll know that you're buying a book that is perfect for a dementia or Alzheimer's patient, but the reader will only know that he/she is receiving a beautiful book that is eye-catching and easy to follow. Neither the title nor any text on or in the book states that the book is for dementia or any type of memory/cognitive problems. It is truly concealed so that the reader is not insulted. If your loved one is overwhelmed by the books on his/her bookshelf but spry enough to feel offended by books labeled as dementia books or by being a children's book, this is your answer. This book is formatted with: A lovely "easy read" story without condescending childlike words. Perfect, slightly larger text (16x font). Short chapters. Short paragraphs. One extra space between each sentence to encourage the mind to take pause. One or two vivid color photos per each short chapter to give a visual clue to the subject matter without distracting the reader. *What the Wind Showed to Me* is the story of what one woman discovers while following the floating path of a beautiful feather caught in a breeze. It is a pleasant, comforting and interesting story. Offer not only a book to be cherished, but also the gift of self-pride.

## **Book Information**

## **Customer Reviews**

"Exceptional series that promotes pride in book ownership for seniors with reading struggles."

Happy, upbeat and superb short stories with remarkably vivid photographs." - Faye Dunningham

If you have a loved one with Alzheimer's disease, dementia or senior reading troubles, this book is just what you've been looking for. Other books in this series include: Autumn's Display, Down by the Meadow, Three Things, The Sandy Shoreline and A Dusting of Snow.

This book is a good start for this Author, and as she goes along this series of books they get better and better! This story is about the wind as it whisks a feather along. The reader follows along in first person discovering what the wind is showing them that day. A bird I had never heard of, flowers, a beach, and other fun things are experienced and learned about on this windy day adventure. This book is good for those who need a story that keeps readers from feeling belittled due to their current mental challenges. This first book in the series reads a little differently than the other two, which helped with added variety for our loved one. I'm grateful to have these books available and have been sharing their existence with my friend and other family members! I hope that you will check them out too, as they are a blessing!

My mother in law who has dementia in the middle stages absolutely loves this book. She said she has read it many times already and it makes her feel so good that she can start and finish reading a book again.

I bought this series for a dementia patient. She LOVED it. The story was short and simple enough for her to follow and gave her back the feeling she had not so long ago when she was a voracious reader. We need MORE books like this on the market, tailored to the dementia patient's needs without having the words Dementia or Alzheimers emblazoned on the cover. I am surprised that there aren't more of these types of books on the market, given the aging baby boomer trend.

Bought this for my mentally failing father. I didn't realize it was quite so 'feminine' when I ordered it. I told him it was written specifically for someone who used to read a lot but didn't any longer and that he may or may not like it. He actually read it and said he liked it. Said it was about 'butterflies and things'. And he didn't argue when I said I would order one of the others for him. Makes me happy to be able to give him something to do when he feels there's nothing left to do but stay in bed and sleep.

I am a private duty nurse and I bought this book for one of my Alzheimer / Dementia patients and she absolutely LOVED IT!!! She totally felt like she could read again and she LOVED the pictures! It was just enough book for her to handle , not to complicated . Just perfect!! I look foward to buying all the books from this author as she did a wounderful job keeping in mind on how hard it is for Dementia & Alzheimers patients to stay focused and making them feel good again to be able to read. I LOVED IT !! IT REALLY MADE MY HEART WARM TO SEE MY PATIENT SO HAPPY!! THANK YOU! Mrs. Emma Rose Sparrow. Best Wishes, Lora.

I appreciate the effort to publish a book especially for persons with dementia. I was a little surprised that it was so short. My mother did seem to appreciate the story. It was good to see her reading again. The type size and layout were helpful to her enjoyment.

My nana's doctor recommended reading as a good activity to help with cognition when she was diagnosed with dementia, but as the disease progressed it was difficult to find books that she could read without giving up in frustration. What The Wind Showed to Me was a great book for her because it described something that she could actually relate to - a walk out side. It describes the sounds of birds, feeling the wind, things that could bring her own memories up and I think it made it a lot easier for her to continue reading. The book has large font which she was quite excited about!

I bought 4 books by this author to donate to a local nursing home. I enjoyed them myself so I'm sure the people at the nursing home will also. The ones with reading have bigger text (not huge) to make it easier to read. This one is written in short chapter form. easy for reading to someone who can't read themselves also
