# Biomagnetism. An Interdisciplinary Approach. (Nato A S I Series Series A, Life Sciences)

## Synopsis

Biomagnetism is the study of magnetic fields that originate in biological systems. This is a relatively new discipline that has attracted considerable interest throughout the scientific community. The study of biomagnetic fields requires the use of techniques and concepts drawn from widely disparate scientific disciplines. To make these techniques and concepts available to a wide spectrum of the scientific community, a NATO Advanced study Institute on Biomagnetism was held near Frascati at Grottaferrata, Italy, in September 1982. This volume is based on the lectures delivered by scholars representing many different scientific areas, ranging from solid state physics to psychology. It attempts to preserve the coherent development of concepts drawn from physiology, psychology, biology, physics, medicine, occupational health and geology that was evident during the Institute. The reader will quickly become aware that the progress in biomagnetism over the past decade was due principally to the efforts of interdisciplinary teams of scientists. One of the purposes of this volume is to make all of the basic principles and findings of biomagnetism available in one place, so that scientists who have already embarked on the study of biomagnetism or who plan to do so in the near future will have them available for study and reference. Each section of this volume was written by a recognized expert who lectured at the Institute on the topics he describes here.

## Book Information

Hardcover: 706 pages

Publisher: Springer; 1 edition (July 31, 1983)

Language: English

ISBN-10: 0306413698

ISBN-13: 978-0306413698

Product Dimensions: 1.8 x 7 x 1.2 inches

Shipping Weight: 3 pounds

Average Customer Review: Be the first to review this item

Best Sellers Rank: #9,738,692 in Books (See Top 100 in Books) #56 in Books > Science & Math > Biological Sciences > Bioelectricity #1225 in Books > Science & Math > Physics > Electromagnetism > Magnetism #4760 in Books > Textbooks > Medicine & Health Sciences > Medicine > Basic Sciences > Physiology
