## Customer Reviews

Combining up-to-date writing techniques with APA-style, this brief guide will help readers master the skills necessary for writing in psychology. This guide takes readers step-by-step through the writing process; from researching psychological literature, to choosing a topic, all the way through writing, formatting, and presenting their findings in written and oral formats. Special attention is given to interpreting and reporting the results of statistical tests, as well as preparing data displays in tables and figures. This guide also provides practical tips for more general types of writing encountered in psychology and the other social sciences. Ideal for individuals who need to learn the required writing style for professional writing in APA style. --This text refers to an out of print or unavailable edition of this title.

Excellent product

This book is very simple and easy to read. Describes and outlines how to write in the APA style and it's a book that I have referred back to constantly when writing papers for all of my psych courses. I also have the Publication Manual of the APA but this book is much more concise and easier to

understand. Would highly recommend for psych majors or others needing to write papers in APA style.

Just what I needed at an unbeatable price!

You could get more definitive detail from googling the information. I felt like it didn't give me the help that I really needed. There were few examples, and not enough examples for exceptions. A very very very short guide.

I learn to write APA styleAll school papers in psychology should be written APA style. Each piece of information has its place in the article

great

This book was delivered in a very timely manor and is in excellent condition. I want to thank you for your great work and the opportunity to get ahead in my schooling!

My Instructor did not require us to read it so I never did. Although, it seemed like it would be a good read if I needed it.
