Age Range: 7 and up

Grade Level: 2 and up

Customer Reviews

This book is a great way to get young readers interested in space and science. . . this volume goes a long way towards bringing the universe within the grasp of children -- Book Report, Mar./Apr., 1999 --This text refers to an out of print or unavailable edition of this title.

Taken from Chapter 12: Mars People once believed that the planet Venus was very similar to earth. When spacecraft explored Venus and Mars, however, scientists came to another conclusion. Probes took images of both planets, measured their temperature, studied their atmospheres, and discovered that Mars is the only planet most like the Earth. Because of this discovery, Mars is the next planet that astronauts will explore. --This text refers to an out of print or unavailable edition of this title.
