Customer Reviews

A must have book for every oncologist. Well written and well organized. I used everyday to know more about the chemo therapeutic agents, special considerations before administering them. Dose adjustments and different regimens for each type of cancer

Vincent De Vita -Cancer Drug Manual.. 2012... Number one ,source for clinics & doctors..Both side effects and protocols included... I strongly suggest ..

Cancer chemotherapy is dangerous and complex, and generally under taught. For health professionals who need complete descriptions of individual drugs, used singly and in combinations, this book is absolutely essential. Each drug has complete descriptions, indications, mechanisms, interactions, toxicities, dose ranges, categories, and metabolisms. With the level of corporate teaching on the decline, this book provides critical and necessary information. The N.Y. Times had an article about the number of mistakes that are not reported by hospitals, a number of weeks ago. A text like this would help minimize this problem.
