Customer Reviews

My mother raised me to be a "crafty" sort of person. We made plaster casts and painted things like Aztec calendars when I was a kid. A cool thing we did when my parents built a house was to make a family project out of stained glass, but we did it by my parents' ingenuity. The windows turned out

really cool, but I wonder if they might have been even better had we had this book. My parents would have had a fit if we had intentionally broken up cups, mugs, glass tile, and such for other projects. I love that Eshet encourages the aspiring artist in all of us to go ahead and break some things to make some things. The book has awesome step by step instructions including safety precautions for working with sharp, breakable materials. I've honestly never thought about making mosaics on/with some of the objects Eshet shows. The book includes beautiful photos of actual projects to let you know anything is possible. Beautiful tables, bookends, wall art, and more come out looking like pieces that would be expensive if you were to find them in a shop. Make them yourself, tell visitors about them, and save a lot of money with your creativity. If you have one creative bone in your body, get this book and make your home your own. You are only limited by your imagination, and this book will help you unlock that to whole new levels.

In college I had a roommate who used to make the most beautiful mosaic tables. I always watched her do it with awe but never really thought that I could do it for myself since I am not very artsy. My daughter has been bugging me to do a mosaic table with her for years now (bolstered no doubt by my college tales!) so I finally decided to take the plunge! This book has the such a great resource! It showed us exactly what tools we needed and exactly how to make a mosaic. We used the information to make our first table and it came out great! We will definitely be using some of the other instructions to make other projects!

Excellent guide to making mosaics. Has lots of tips and helpful ways to create your own really pretty mosaics. Have found it to be helpful for me. Would recommend

Great purchase. Exactly the colors I need for my mosaic. Ill buy other products from the seller and I highly recommend it.

I bought a cutting tool, mosaic tile adhesive, some colorful ceramic tiles and a wooden board and began to work. I started with a simple flower pattern and it came out so pretty and colorful. The directions are very clear and straight forward. SO - in just looking at the pictures and following the simple directions - i managed to make a flower!!!I recommend this book for anyone who wants to find happiness in creating.

Great book really helped and well written.Really helped when I never had done mosaic crafts

before. Would highly recommend

fun

The author gave a clear and precise informative instructions on how to create mosaics for indoor and outdoor use. Simple and easy to follow. I love the photos and ideas she has put into the book. 5 Stars all the way.
