Terry Bartelt is currently an Electromechanical Instructor at Fox Valley Technical College, with more than twenty five years teaching experience in the field. He was a National Science Foundation (NSF) Recipient for Process Control in 1997 and received another NSF grant in 2005 to develop multimedia materials covering industrial automation related topics. In addition, Mr. Bartelt's

Electromechanical Technology Program was presented the Secretary of Education Award as one of the top ten community college programs in the country.

A little to complicated for then average person unless your specialty is in instrumentation.

Pretty good condition. As described. No complaints here.

It was exactly what it was supposed to, in the condition it was suppose to be in, and i got it in a timely manner. Awesome!

A good introduction to instrumentation. Easy enough to read for a beginner. Contains enough detail to reach an intermediate skill level. Overall a very good book.

Very informative book, only on the second chapter and read when I can. I've already learned good practical information from it.

Needed book for college. Still a steep price for a book dated 2006. Good info.

I needed this book for my last year at school and it came right away it was great to have the book before school started.

In great condition.
