# Writing The News : A Guide For Print Journalists

## Synopsis

This second edition of this guide to newswriting brings aspiring journalists up to date on what it takes to put together a news story, from conception to execution. Veteran journalist, editor and educator Fox walks the beginning writer through the principles and techniques of organizing a news story and writing it with style and depth. In nine chapters, he covers essential journalistic skills, from lead writing and story development to handling quotes and composing feature stories. Fox also pays special attention to questions of style and context, varieties of the basic newswriting structure and alternatives to traditional story forms. His approach should ground a reader in the basic "rules" of newswriting without allowing the process to become a straitjacket. More than a how-to manual, the text is also an appreciation of the craft of newswriting as a modern art form. As such, it should be a valuable source for anyone involved in print journalism or interested in the rhetoric of news.

Writing the News covers the following areas: Evolution of newspaper style, Writing effective leads, Story development, Stylistic considerations, Handling direct quotes, Varieties of the basic structure, "Featurizing" the news, Writing the feature story -- This text refers to an out of print or unavailable edition of this title.

Of dozens of how to books on writing for print, this one captures precisely what a reporter has to contend with when facing the job of organizing the elements of an article that's to be published. Read it and keep it near your laptop to refer to consistently before you get the hang of it and render a story readable and for publication. After 25 years of journalism, I have to admit I leaned plenty with this Fox volume. Passed it on to my daughter at Berkeley to refer to.

This is a small book just right for reading.

I purchased this book for a course I did and I must say it was a good book. Simple language.
