Merriam-Webster, Incorporated is America's oldest and most respected publisher of dictionaries and other language reference products. Our staff of full-time lexicographers is the largest in America and our database of more than 16.5 million examples of words used in context is the most extensive in the world. With more than 170 years of accumulated knowledge and expertise this distinguished company represents a tradition that dates back to Noah Webster.

The book is full of MANY types of activities and introduces dictionary concepts and terms in a logical progression. Students could even use this book self-guided. Pages are perforated but also photocopy well. The only problem is that answers in the answer key were arrived at using Webster's New Explorer Student Dictionary (published by Federal Street Press in cooperation with the editors

of Merriam-Webster). Students using other dictionaries may come up with answers which do not match the answer key, but are still correct! As long as you know this ahead of time, this should not be a problem. I used this book with an adult literacy student who was reading at around the 4th grade level. I highly recommend this book to others, whether they are traditional teachers, home-schoolers or adult literacy students. I have used another dictionary skills book (Dictionary Skills Grade 4 by Teacher Created Resources) which I found to be too childish in its appearance and activities. It also falls behind the Merriam Webster book in its ability to be used by self-guided students.

This is an excellent workbook for my adult literacy students. It arrived promptly. Thank you.
