## **Customer Reviews**

"Eclectic" is the word for this collection of plans for do-it-yourself play houses. The projects range from the simplicity of a sapling lean-to to an elaborate A-frame that more closely resembles a vacation home. In between are appliance box castles, plastic pipe assemblages, a miniature Victorian cottage, and a neighborhood clubhouse that doubles as a garden shed. Most of the 30 or so plans provide a materials list and easy-to-follow construction drawings. Concern for safety as well as fun are reflected in the projects, some of which are original and others of which are compiled from extension service brochures or the promotional literature of lumber manufacturers and trade associations. A good source of ideas for do-it-yourself parents or child care providers. A worthwhile addition to most public libraries.- Bill Demo, Tompkins Cortland Community Coll., Dryden, N.Y. Copyright 1993 Reed Business Information, Inc.

It's all black & white, the blueprints are mashed together, the font is too small, not for the novice builder.

Love it simple plans and explanations

I was in the process of trying to find information and building plans so that I could build my own rustic cabin in my wooded back yard. I had searched various book stores and online for a book that contained all the information I was looking for (pictures, plans, detailed building instructions). I came across this book at my local library and upon flipping through the pages I discovered that it was the exact resource I was looking for. This book is great for anyone who is looking to build their own backyard or back country mini cabin or guest house. It gives all the details that a novice builder needs to complete a project. Some projects are very detailed while others are not, but it is just what I was looking for. I highly recommend this book.

This book actually contains detailed plans, not just pictures.
