Drawing on his experience of countless hours on the shooting range, and backed up by meticulous research, Oyvind Flatnes relates more than 500 years of development and covers the huge range of different ignition systems, models, and patents. Customer Reviews

Oyvind Flatnes is several times the Norwegian and Nordic black powder shooting champion. He has previously published a book about black powder shooting and is a regular contributor of history and firearms articles to magazines and books.

This is a really great book, well written and illustrated. I'm a fairly knowledgeable shooter and in the past spent about three years exclusively researching and shooting 19th century black powder weaponry. In reading Mr. Flatnes' book I came to realize the many gaps in my knowledge. There's a lot here to like, including in-depth treatment of: needle guns and paper cartridges, tip-up breech-loaders, false-muzzle target rifles and much more. I'm really glad I found this book, and am happy to add it to my firearms library.

If you are at all curious about the history of firearms, this book is for you. More than just thumbnail sketches but not overwhelming with minutiae, this book contains an excellent history of the development of black powder firearms. Excellent references and enough details for someone just beginning to study the history of firearms.

Valuable resource for all shooters interested in black powder. Full of information regarding the history and evolution of black powder arms.

one of the best books on black powder shooting I have ever read;excellent research, writing, and information.

Outstanding book . Well written and informative. Very good book on black powder rifles and development of modern cartridges. Thanks

A must book to have, great research

A very enjoyable read on the history of firearm development! Detailed without being tedious in any way. I had read some of the author's on-line articles, so I had a pretty good idea of his style and that I would be satisfied with the book before I bought it. I was in no way disappointed.
