Oxford Handbook Of Nephrology And Hypertension (Oxford Medical Handbooks)

Synopsis

Fully revised and expanded for its second edition, the Oxford Handbook of Nephrology and Hypertension provides clear, concise information and practical guidance on the day-to-day management of patients with renal disease. It is the essential resource for all those working with renal patients, including specialist trainees in nephrology, foundation doctors, renal nurses and general practitioners. A vital practical guide for those on the wards, and a valuable resource for all those studying for exams, this is the must-have handbook of renal medicine. Based on the Oxford Textbook of Clinical Nephrology and companion to the Oxford Handbook of Dialysis, this handbook provides vital clinical knowledge on the full breadth of renal care. The chapters on AKI and CKD have been significantly expanded to represent their enhanced primacy in both primary and secondary care. The recent shift in understanding from acute renal failure to AKI has led to fast-paced change, and this handbook has been specifically revised to ensure the reader is up-to-the-minute in this vital area of renal care. Renal transplantation has also greatly increased in volume and complexity in recent years and a full chapter has been given to this important area, which has been thoroughly updated and greatly expanded. Comprehensive, easy-to-use, and concise, with a strong focus on practical advice, and detailed guidance on everything from common conditions to complex clinical care, this handbook ensures that the reader always has the information they need at their fingertips.

Customer Reviews

"The book manages to cover all aspects from cellular biology to carrying out practical procedures and for this reason you can see why it would be in the pockets of most practicing nephrologists."
--Journal of Renal Nursing
"I am amazed at how clearly and succinctly the essential information is presented. ...no detail is left out, making this an easy and coherent read." --Doody's Notes

Simon Steddon, Consultant Nephrologist, Guy's and St Thomas' Hospitals, London, UK, Alistair Chesser, Consultant Nephrologist, St Bartholomew's and the Royal London Hospitals, UK, John Cunningham, Professor of Nephrology; Physician to the Queen and Head of the Medical Household, Royal Free & University College Hospitals, London, UK, Neil Ashman, Consultant Nephrologist, St Bartholomew's and the Royal London Hospitals, UK

I wanted a easy to read but good handbook before joining Nephrology fellowship. After doing some research I settled on this book and was never disappointed. Excellent resource for all Nephrologists. All topics are well covered but concise in a easy to read format. Particularly a very good resource before exams to consolidate your knowledge of topics.

GREAT RESOURCE
