Creative Haven NatureScapes Coloring Book (Adult Coloring)

Synopsis

Seashells on the sand, peacocks in flowering magnolia trees, and butterfly fish in elkhorn coral. Thirty-one original designs present spectacular combinations of natural elements – from flora to fauna – in eye-opening, full-page patterns. Illustrations are printed on only one side of the perforated pages for easy removal and display. Specially designed for experienced colorists, NatureScapes and other Creative Haven® adult coloring books offer an escape to a world of inspiration and artistic fulfillment. Each title is also an effective and fun-filled way to relax and reduce stress. Previously published as NatureScapes.

Customer Reviews

An accomplished science and nature illustrator, Patricia J. Wynne is the recipient of the 2008 Theodor Seuss Geisel Honor and has won awards from Parenting Magazine, the John Burroughs Association, and the National Science Teachers Association. Patricia's artwork has appeared in galleries, magazines, newspapers, and more than 100 books for both children and adults. She is the author of numerous successful Dover titles on science and design.

One of Creative Haven's best coloring books. Every illustration in this book is Beautiful with

outstanding art work; you won't know which one to color first! School aged children and adults will love this book. I am adding a picture that I used both Gel Pens and Colored pencils on.¹ This book has a nice variety of nature illustrations which include 11 Bird, 6 Butterfly, 3 Mammal, (Giraffe, Zebra, Meerkats) and 7 Seascapes (dolphins, whales, fish, seahorses, and sea shells) then add a Salamander, Frog and Bee, everyone will find a picture they just have to color.² 30 Illustrations one per page, (the back is blank) printed on Heavy weight, perforated, bright white paper, outlined and framed in with thin black lines.³ Perfect for crayons, colored pencils, Gel pens, or Markers. Place a scrap piece of paper under the page you are coloring and leave it until the page is dry if your Gel pens or Markers leach through the paper or remove the page from the book⁴. Very detailed pictures and along the binding each species is identified so you can look them up if you want to. This is great for children.⁵ The Illustrations are collages of the species and/or like my favorite one 13 good sized cardinals sitting on tree branches with leaves and round berries.

This book has beautiful images. I would like to find more books by this artist. One image per page, backs blank. Bleed through does happen, so use care to protect the next image.

Love this coloring book! White heavy pages and the prints are clear & precise. I buy these books for the children in my family & they love them! Good colored pencils are best used on these. But you can use fine-tipped markers as well...but they may bleed through. Colored pencils & a sharpener is all you need for the best end results. I highly recommend this coloring book for all ages!

This coloring book is absolutely beautiful. Some are a little more detailed than others. I really like how they have a simple explanation of the picture on the side. The only picture I don't understand is one of a herd of zebras with very little background... it's already colored ;)

I recently purchased Nature Scapes- it's really enjoyable and you feel good after the finished picture. this paperback is good quality & contains pretty accurate drawings. I highly recommend this product.

I am 34 yrs old and I still love coloring. This book is perfect for the adult colorer. There's intricate details and the pages are one sided.

I love this book. Not sure if it has to do with the fact I love nature and animals but I disagree with the

bad reviews. Everyone has their own taste. I did look through other creative haven books but this is the only one that really drew me in. I like it more than the Butterflies & Flowers by Cherina Kohey because I have nothing to compare to yet as I have many books waiting to be colored. Will update later. I am attaching a photo out of the page I colored using only prisma verithins (the frogs). im currently coloring the parrots so I will attach that as well once done.

This is an awesome collection of 31 original designs that present spectacular combinations of natural elements. The illustrations are printed on only one side of perforated pages for easy removal and display. I especially love that each page has a description of the illustration printed on the page which is very useful for searching what something looks like for reference. I mainly use my coloring pencils and I really enjoy coloring these pages which are specially designed for experienced colorists. It is quite easy to escape to a world of inspiration and artistic fulfillment while coloring these pages. I would definitely recommend this coloring book to family and friends.
